

## THE ZER METHOD

Our governance advisory approach follows a two-phase process.

In Phase 1, we aim to understand the status quo and, based on findings, create a governance roadmap.

In Phase 2, the results of Phase 1 are used to progressively implement a tailored governance framework.

### Phase 1: The Governance Audit

The audit sheds light on the the gaps between your current governance structure and optimal positions.

You will receive a corporate governance audit report, including recommendations to guide your organization in closing identified gaps.

### Phase 2: The Progressive Rollout

Based on the audit results, we will guide you in progressively implementing the governance frameworks and setups appropriate for your organization in all impacted domains, e.g., data privacy, ESG, finance, Industrial relations.

## GOVERNANCE ADVISORY

### Leverage governance for sustainable growth

Good governance is not bureaucracy-it is your growth engine.

By mastering regulations, you go beyond avoiding legal pitfalls; you build an unshakable foundation of trust with stakeholders, customers, and partners.

This deep understanding offers provides you safety and gives you valuable insights into emerging trends in your business environment.

We help you turn compliance into a distinct competitive advantage, boosting your credibility and positioning your organization for sustainable success.
